

**VIRUS**  
*Main Laser Mod*

When firing at an adjacent robot, a bug may be given instead of the normal point of damage.

Cat. VRS-012021  y  n

**TOOLKIT**

You may repair two points of damage on a single wrench, and three points on a double.

Cat. TLK-012022  y  n

**TELEPORT**  
*Optional Weapon*

Experimental! Instead of firing your laser at a robot, you may exchange position (but not facing) with it. Due to transmission difficulties, however, both robots get a bug.

Cat. TEL-012023  y  n

**TROJAN**  
*Main Laser Mod*

When firing at a robot executing the same instruction as you do, a bug may be given instead of the normal point of damage.

Cat. WRM-012024  y  n

**REWIRING**

By clever rewiring, locked registers may be repositioned in the program (but stay locked until repaired).

Cat. RWR-012025  y  n

**HEATSINKS**

Your robot's heat sinks may absorb one point of laser damage per phase. A second point will destroy the sinks, and gives a bug in as well as one point of damage.

Cat. HTS-012026  y  n

**PICKPOCKET**  
*Optional Weapon*

When facing the rear of an adjacent robot, you may steal any one option not in use this phase.

Cat. PKP-012027  y  n

**CRACKED PASSWORD**  
*Run Time*

You may reprogram the conveyor belt you are on to reverse its direction, affecting all robots on it. Usable only once (but may be recharged as other options with charges).

Cat. CRP-012028  y  n

**RESCHEDULER**  
*Run Time*

Choose your own priority after the program cards for the phase has been revealed, and ignore the one on your own card.

Cat. RSC-012029  y  n
